## DETAILED ACTION

### ***Response to Arguments***

Applicant's arguments filed 10/30/2003 have been fully considered but they are not persuasive. Simply claiming Foreign Priority to a foreign patent doesn't automatically incorporate that foreign patent. The Applicant has to show or actually state that the foreign reference is incorporated by reference. Currently, the Applicant has failed to satisfy the abovementioned requirements. Furthermore, even if the Applicant had officially incorporated the Foreign Priority patent by reference, the reference still recites both types of units (i.e.  $\text{m}^{-3}$  and  $\text{cm}^{-3}$ ).

Therefore, the Applicant is not allowed to bring in essential or non-essential material from the particular Foreign Priority reference of this case.

The incorporation of essential material in the specification by reference to a foreign application or patent, or to a publication is improper. Applicant is required to amend the disclosure to include the material incorporated by reference. The amendment must be accompanied by an affidavit or declaration executed by the applicant, or a practitioner representing the applicant, stating that the amendatory material consists of the same material incorporated by reference in the referencing application. See *In re Hawkins*, 486 F.2d 569, 179 USPQ 157 (CCPA 1973); *In re Hawkins*, 486 F.2d 579, 179 USPQ 163 (CCPA 1973); and *In re Hawkins*, 486 F.2d 577, 179 USPQ 167 (CCPA 1973).

***Response to Amendment***

The amendment filed 11/4/2002 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows:

The changes of units in the specification and claims from  $\text{m}^{-3}$  to  $\text{cm}^{-3}$  are not supported by the original disclosure. Applicant is required to cancel the new matter in the reply to this Office Action.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 4-11, 13, 17-22, 25-33 and 35-39 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The invention as now claimed having concentration in  $\text{cm}^{-3}$  is not supported by the original disclosure. Therefore, there is no evidence that the Applicant possessed the invention as now claimed at the time of filing.
